

# V2 Cloud

## Holistic Virtual Computing

The strategic cloud partner for SMBs, MSPs and ISVs

Looking for relief from these challenges?

- Anywhere access to holistic computing for staff, contractors, and clients
- IT resource scarcity and key skills lacking
- Manual effort to deploy and maintain computing resources too big a tax on IT
- Manual effort on reactive tickets and unreliable support from vendors
- Securing data on remote endpoints
- Business continuity and cyber threats

## V2 Cloud Key Benefits

- ✓ **Holistic computing** - desktops, apps of any kind, servers of any kind, files, and databases, all centralized
- ✓ **Strategic extension of your IT team** without hiring full-time staff
- ✓ **Proactive and preemptive support** solves issues before they surface
- ✓ **Inherent security and compliance** - no data stored on remote endpoints
- ✓ **Orchestrated cyber security** - live monitoring and penetration testing
- ✓ **Programmatic disaster recovery** routine backups and quick restore

### V2 Cloud Differentiators

Exceptional support - responsive, friendly, and effective

Predictable pricing with no bandwidth fees

Intuitive and easy self-management tools

Most robust cloud resilience to help keep your business thriving

Best value for SMBs, MSPs and ISVs

Highest rated virtual computing vendor - 200+ five star reviews on G2

## More Than Just VDI or DaaS

- Flexible tiers to fit any team and any mix of users.
- Infinitely scalable and low cost block storage for advanced storage needs with multi-year retention. Set up different backup frequencies and retention periods for different types of data within a holistic program.
- Enhanced performance and cost competitive GPU computing to align to any mix of intensive computing requirements.
- Dedicated IP addresses and dedicated firewalls when applications or site-to-site VPNs create specialized connectivity requirements.
- Linux Ubuntu support so developers can double down on security, flexibility, and performance in the cloud, and companies can move to the cloud more holistically.

## V2 Cloud for Partners

- Strategic extension for MSPs to bolster their IT resources, cloud-enable their customers and grow their business cost-effectively,
- The fast track to the cloud for on-premise software solutions and increased resilience and cloud resource effectiveness for SaaS solutions.

## V2CloudCare - Cloud Resilience Amplified

Plan	Best For	Monthly Cost	Coverage
SECURED	Businesses needing proactive cyber threat management	\$7.5/user	Ideal for businesses that need proactive threat management without significant complexity.
MANAGED	Businesses needing business continuity assurance	\$15/user	Ideal for business that need scalability, operational continuity, and 24x7 support.
ADVANCED	Businesses requiring strategic monitoring & management	\$25/user	Ideal for businesses that need oversight, minimal downtime, and dedicated support.
