

# V2CloudCare

v2cloud

## The Challenge

Businesses face escalating IT risks that threaten their operations and bottom line:

- ➔ Cybersecurity threats costing \$12.5B annually in the US
- ➔ IT downtime at \$55K/day when systems fail
- ➔ IT expertise shortage with costs exceeding \$200K+/year for qualified staff
- ➔ Lack of proactive monitoring and automated security approaches
- ➔ Insufficient internal knowledge to assess and manage complex IT environments

## Key Benefits

- ✓ **Proactive approach to security**, support, and performance monitoring
- ✓ **Access to IT experts** without hiring full-time staff
- ✓ **Scalable plans that grow** with your business
- ✓ **Vendor consolidation** - manage everything through one provider
- ✓ **No firefighting** - fewer risks and real peace of mind
- ✓ **Effortless scaling** without complex IT overhead

## Five Pillars of Business Resilience

1. IT Management Monitoring & Health Checks
2. Technical Support & Services
3. Onboarding & Training
4. Security, Antivirus & Threat Management
5. Deployment, Configuration, Data Backup & Recovery

## The Solution

### V2CloudCare

**All-in-one managed IT solution** that strengthens business resilience through core infrastructure allied with comprehensive managed IT services.

- **V2 Cloud Infrastructure:** Desktop-as-a-Service + Virtualized Servers (Application, File, DB, GPU)
- **V2CloudCare Services:** Cybersecurity, Operational Continuity, IT Management

## Service Tiers

Plan	Best For	Monthly Cost	Coverage
SECURED	Businesses needing proactive threat management	\$5/user	Ideal for business that need scalability, operational continuity, and 24x7 support.
PREMIUM	Businesses requiring strategic oversight & minimal downtime	\$15/user	Ideal for businesses that need oversight, minimal downtime, and dedicated support.

Minimum commitments: Secured (\$10/month), Premium (\$45/month)

## Why Choose V2CloudCare?

Whether you have an existing IT team or zero in-house expertise, we meet you where you are. Our comprehensive solution eliminates the complexity of managing multiple vendors while providing enterprise-level security and support.
